Long Xuyen, An Giang

OBJECTIVE

To advance full-stack development skills, applying modern solutions into software production and creative design.

SKILLS

PROGRAMMING & WEB DEVELOPMENT

Python, Golang, Nextjs, Nestjs

AUTOMATION

N8n

DESIGN

Photoshop, Illustrator

INTERESTS

Researching Automation and Machine Learning

WORK EXPERIENCE

MiTelAI JSC

6/2024 - Present

FULL-STACK DEVELOPER (FRONTEND & BACKEND)

- Designed and developed responsive web interfaces, optimizing UI/UX for AI-powered SaaS Chatbot applications using Frappe, ERPNext, HTML/SCSS, and TypeScript (Vue.js, Next.js, Vite).
- Built and integrated intelligent chatbots into websites and messaging platforms using n8n, Zapier, Google Apps Script, and AI APIs (OpenAI, Amazon Bedrock).
- Created automated workflows for data processing, automated emailing, lead management, auto-posting, and customer engagement.
- Designed banners, posters, and logos to support online marketing campaigns; managed and executed Facebook Ads, Google Ads, and YouTube Ads; optimized ad performance to reduce CPA and increase conversion rates.

EDUCATION

An Giang University

2020 - 2024

Bachelor of Information Technology

- GPA:** 3.51 / 4.0
- Graduated with an **Excellent (Honor) degree**.
- Actively participated in volunteer activities and scientific research. Notably, my graduation thesis was recognized as a university-level scientific research project, demonstrating strong capabilities and a passion for learning throughout my academic journey.

PROJECTS & ACTIVITIES

Faculty of Information Technology, An Giang University

2020 - 2024

Student Researcher

- Graduation Thesis:** "Predicting Poor Prognosis for COVID-19 Patients Using Deep Learning".
- Applied Machine Learning techniques to analyze clinical, preclinical, and underlying disease data.
- The project was recognized as a university-level scientific research project, validating its practical and scientific value.
- Thesis Repository:** <https://github.com/hoanu14302/Predicting-poor-prognosis-for-COVID-19-patients-using-deep-learning-.git>
